

MALEIC RESIN P – 230

TYPE: Rosin modified Maleic Resin.

PROPERTIES: High solution viscosity and melt point, good colour and colour retention, good solvent release.

CONSTANTS:

Melting Point	140°C.
Acid Value	20.

SOLUBILITY: Soluble in aromatic hydrocarbons, esters and drying oils.

COMPATIBILITY: Compatible with Polyamide Resin. Mainly used for the Modification of polyamide based inks. In paint formulation can be used as shellac substitute also compatible with N.C.
